# IP Phones
5200 Series & AOM

Unified Communications to fit your budget with no compromise

Enjoy full Unified Communication features with the easy-to-control Samsung IP Phones. Integrated with a PC, Samsung's IP Phone Series provides enhanced multimedia UC solutions such as Presence, Scheduler, Instant Messaging and Video. The SMT-i5200 series have a significant competitive advantage in video solutions and recording, as well as being an award winning modern design.

The 5200 series benefits from the latest techniques in digital speech processing and audio technology all delivered over IP, the natural technology for best performance. The Samsung IP handset delivers in all respects. If communications are clear, the message you want to deliver is also clear.

Open platforms. The open architecture of XML allows the rich world of software applications the ability to integrate with your handset display and keys. Your investment in Samsung IP technology is ready for the future as well as today.

Direct access to voice mail, call logs, system directory are just a few of the items accessible at the touch of a button giving you a clear window to your communications world.

The affordable Samsung 64 button Add On Module (AOM) simply connects to any 5200 series handset using a standard data cable to provide an instant increase in the number of buttons available when they are needed.

Flexible design allows the handset to be positioned at 30° and 60° on your desk or if required wall mounted without requiring any further hardware or adaptors.

Take full advantage of IP telephony that will position your business for success.
