

New life, new functionality
for existing **video equipment**

Improved **security** and **privacy**
for all **video communications**

Lowers cost of ownership
one **management platform**

Total **interoperability**
call anyone: Skype for Business, Cisco,
Lifesize, Polycom

EVERYTHING YOU NEED TO KNOW

Whether you're looking to dispense with legacy or end-of-life video infrastructure, need spam call protection, or require seamless interoperability for your current video systems, StarLeaf Endpoint Subscriptions are the answer.

Now you can protect current video investments.

Moving your existing H.323/SIP video systems to the StarLeaf Cloud will extend their life and deliver increased functionality, all while removing the need for video network infrastructure.

With StarLeaf you gain:

- Unlimited direct calling for all, and specifically for calls between Skype for Business and H.323 endpoints
- Direct calling to any other external party on any video endpoint with total interoperability covering any hard or soft endpoints; Skype for Business, Cisco, Lifesize, Polycom, StarLeaf etc.
- Secure calling
- Eradicate nuisance calls with spam call protection
- Join now button available for all endpoints on the StarLeaf Cloud
- Bi-directional screen sharing between all endpoints including between your endpoint and Skype for Business
- Scheduled conferencing that includes global audio dial-in
- Firewall traversal
- Endpoint monitoring
- Usage and performance reporting
- A central management dashboard
- Full redundancy
- Compliance with regional data protection legislation

And remember, with the StarLeaf Cloud you'll always be able to connect, no matter what the other person is using in their meeting room or on their desktop.

TECHNICAL SPECIFICATIONS

Protocols
