Video support

Video send and receive HD video

Security

Supports industry-standard, fully secure, video and audio

QuickMeet™ — for instant ad hoc multiparty meetings

With QuickMeet you can escalate from a point-to-point call straight into a multiparty meeting. This is only available to users of the StarLeaf app and endpoints. It is unique, no other service provider offers instant multiparty meetings.

@ a Glance

- Instant ad hoc meetings for up to 20 people
- Real-time call escalation from direct to multiparty meetings
- Easy and intuitive 'create conference' button
- Available to all StarLeaf hardware and software users
- Click-to-Call browser based dialing

Scheduled and Meet-me — for high performance, reliable video meetings

A powerful and flexible video conferencing service that brings together all your existing video systems into one VMR (Virtual Meeting Room) – that's all room, desktop and mobile clients including StarLeaf, Skype for Business, and all H.323/SIP systems such as Cisco, Lifesize, Polycom, etc.

VMRs with unrestricted use

This service gives you the flexibility to create both virtual meeting rooms (VMRs) and organize scheduled conferences. The VMR is always available for immediate use. A scheduled conference ensures all participants receive a calendar invitation with full dial-in details.

Meet anyone on any video equipment

From your dashboard you can schedule a meeting and automatically send a personal calendar invite to anyone anywhere in the world. You don't have to concern yourself about what system they use, or even if they have a video endpoint. This is because your meeting invitation provides clear dialing instructions.

@ a Glance

- Unrestricted – everyone can schedule and host a meeting
- Permanent and scheduled VMRs
- Automatic calendar invites with dialing instructions for all video and audio participants
- Join conferences with one button to push
- Unlimited minutes and guests
- Large meeting capacity for up to 50 participants
- Seamless interoperability

Interoperability — It all just works

Here at StarLeaf we don't want to disrupt your current video equipment, and we won't ask you to discard it either. That's why we ensure full and seamless inter working between all video equipment. With our service you can connect to any external party and have them join you in your VMR or call them directly. And we don't just interoperate with these systems, we can manage them too, with our simple H.323 and SIP registration service you can extend your video network and move away from managing and owning complex and costly video network infrastructure.
